Experience the most beautiful fire With every fire we design, we ask ourselves: "what role does a fire play in the lives of our customers?" Our fires prove every day that we look beyond high reliability. Every detail, no matter how small, contributes to an optimal combination of function, atmosphere, durability and comfort. In short, the most beautiful fire.

OPTIONS AND POSSIBILITIES • The selection steps • Tailor-made atmosphere and warmth • Your ideal flame image • Burner bed and interior finish • Door systems and glass TECHNICAL SPECIFICATIONS

FREEDOM OF CHOICE

WHICH GAS FIRE SUITS YOU?

You want a gas fire. A good idea, because it not only provides warmth and comfort, but also atmosphere and cosiness in your home.

Which gas fire is best suited for your home?

1

Atmosphere and warmth in your home

Would you like a new fire for the warmth or do you prefer the atmosphere? The motivation behind your wish determines the first step on the way to your new gas fire.

Design for everyone

Do you like a classic design or do you prefer a sleek and modern one? At DRU you will find gas fires for every taste and every room. From built-in to freestanding fires, from 1-sided to 3-sided flame view or even with a view through like a tunnel. You choose!

The capacity of the gas fire depends on the room where it will be placed, how well your house is insulated and the use of the fire: do you turn it on every day or only on weekends, for example? Knowing this means you always choose the most sustainable solution for your needs.

At an authorised DRU dealer in your area you can get tailored advice and take a closer look at our models. This way, you can make a well-considered choice for a fire you'll enjoy for years to come.

TAILORED ATMOSPHERE AND WARMTH

Is a gas fire just for autumn and winter? No, it's not! In spring and summer you can enjoy the cosy feeling and an atmospheric flame image, even without the accompanying heat.

ECO WAVE:

always a lively fire and warmth to your liking

If you choose a fire with Eco Wave, you can design the pattern of the flame intensity, which can be very economical. This is ideal if you want the atmosphere and a beautiful flame pattern, but not the heat. You can switch it on with the remote control, or with the smart app you can control everything yourself.

ECO GLOW:

100% atmosphere, 0% heat

Do you like to look at a lit fire, but don't always need the warmth that comes with it? Many of our fires have an optional glow bed: Eco Glow. This lifelike glow bed is separately adjustable, independently of the flames. You determine the atmosphere via the app or with the remote control, with or without heat from the fire.

CREATE A PERSONAL FLAME PATTERN

With our unique burner technology, you choose the flame pattern that suits your taste:

DYNAMIC FLAME BURNER®

- Lively, natural flames
- Burner 1: for width and depth in the fire
- Burner 2 (switch on/off): gives the flames volume and height

TRUFLAME BURNER®

- Perfect flame image
- Gives the illusion of a high and natural wood fire
- Burners at an upward angle, integrated in the ceramic logs

VARIO BURNER

- A rich flame image with lots of depth
- The experience of wood fire: wide and high flames
- Multiple dimensions due to the unique Zigzag shape

LINE BURNER

- High flames in a nice clean line
- Flames across the entire width of the fireplace
- Unique, dynamic and sleek flame image

Brown log set

BURNER BED

- Log set brown or white (birch): indistinguishable from the real thing due to structure and colour
- Anthracite glass: the reflection of the fire provides even more depth
- White or grey stones

Available on a part of the assortment.

White log set

Anthracite glass

White stones

Grey stones

INTERIOR FINISH

- Black: sleek design and ideal in combination with Clear View glass
- Ceraglass and matt glass: A mirror effect creates extra depth in your fire.
- Rib cast: for a robust look
- Natural: light yellow wall with fine profiling
- Classic stone: a classic or country look, like the old brick fireplaces.

Available on a part of the assortment.

Natural Classic stone (DRU)

Classic stone (Global by DRU)

OPTIMAL VIEW OF THE FLAMES

EASY RELEASE DOOR SYSTEM

Cleaning in a jiffy

We provide several gas fires with a drop down door. Easy to open without expertise and ideal for quick window cleaning and annual maintenance by an engineer.

- Can be opened directly without screws or expertise
- Subtly concealed door locks
- Discreet frames for more glass surface and uninterrupted flame vision
- Neat glass-on-glass for 2 and 3-sided models
- Room sealed: safe and optimal combustion

CLEAR VIEW GLASS

Anti-reflective glass

A good view of the flames means extra enjoyment of your burning gas fire. That's why DRU offers you Clear View Glass*: anti-reflective glass that gives you an optimum view of the fire. Transparent and so clear that it looks as if there is no glass at all.

* Available on virtually the entire range.

Eco Wave [P. 7]

Eco Wave gives you total control over the heat output while retaining a lovely flame pattern of your choice.

Eco Glow [P. 7]

Real life illuminated glow bed. Individually adjustable via app or remote control. With or without heat from the fire.

Dynamic Flame Burner® [P. 8]

Dynamic Flame Burner® gives you the feeling of a natural wood fire, but with the convenience of gas.

Vario Burner [P. 9]

The Vario Burner provides depth and width to the flames of your fire.

Line Burner [P. 9]

The Line Burner provides a lovely tight flame pattern over the width of the fire.

Easy release door system [P. 12]

The Easy release door system is a unique drop down door that lets you easily clean and maintain your fire.

Clear View glass [P. 12]

No bothersome reflections; always a clear view of the fire.

Safety Control System (Dutch: VBS) [P. 13]

These fires are completely suitable for various types of gasses and fully prepared for the future.

Domotica Home Automation [P. 82]

Possibility to connect to home automation systems for smart control in the home.

App Control [P. 82]

All DRU Eco Wave fires can be operated via smartphone or tablet with the free DRU Control App (IOS or Android).

Frames [P. 85]

Frameless installation or optional frames (customisation possible).

PowerVent® [P. 86]

PowerVent® gives you the freedom to install an attractive gas fire regardless of the available space.

Direct flue [P. 87]

Directly on the fire via a 90° pipe bend to the outside.

THE DRU PRODUCT RANGE

Fantastic quality and plenty of choice.

DRU fires offer a perfect solution for every situation and every type of home interior.

All the fires in our large product range meet the strictest requirements in quality, performance, durability and convenience.

From the perspective of design and innovation, the DRU product range is unique.

13 P.82

Truflame Burner® [P. 8]

Double log burner for a wide/deep fire and a very high flame picture.

Line Burner [P. 9]

The Line Burner provides a lovely tight flame pattern over the width of the fire.

Clear View glas [P. 12]

No bothersome reflections; always a clear view of the fire.

Safety Control System (Dutch: VBS) [P. 13]

These fires are completely suitable for various types of gasses and fully prepared for the future.

Domotica Home Automation [P. 82]

Possibility to connect to home automation systems for smart control in the home.

Direct flue [P. 87]

Directly on the fire via a 90° pipe bend to the outside.

Open combustion

- Oxygen comes from the living area
- Flue gas exhaust via a single pipe
- Possible with an existing chimney
- Usually inexpensive and easy to implement

Closed combustion

- Oxygen comes from outside the building
- Extraction of flue gases via wall or roof
- Inlet and outlet via double-walled pipe
- Preferred option for well-insulated or mechanically-ventilated properties

...TO MAKE you FEEL AT HOME

IORAL BY DRU

Global by DRU gas fires are perfectly well balanced between desirability and affordability. With so many options, there is always a fire that fits with your interior design.

Due to their shallow depth, the compact Global gas fires are suitable for nearly every room, regardless of whether you live in a mid-terrace house or an apartment. Installing is simple, prices are attractive, the quality is excellent and the many options allow you to personalise your fire. That makes Global gas fires suitable for virtually everyone.

In the Global gas fire collection, you can select front fires with one side in glass and 2-sided and 3-sided fires for a view of the flames from various angles.

GLOBAL 55XT CF - 70XT CF

Transform your old fireplace.

Global 70XT CF

The Global 55XT CF and Global 70XT CF are equipped with the unique Truflame Burner®. The flames are enclosed in authentic wood-effect ceramic logs. This causes the flames to gently lap around them, creating a completely realistic flame effect. Thanks to its dimensions, the fire can be installed into an existing Class 1 chimney.

Characteristics:

- With unique Truflame Burner®, realistic fire aspect with generous glowing embers
- Extensive choice of interior finishes
- Optional Clear View (anti-reflective) glass
- Slimline build in depth

Choose your own size:

(For precise dimensions, see p.94)

GLOBAL 55XT CAVITY BF

The perfect solution. No Chimney - No space lost - Perfect flames.

The perfect fireplace solution for homes with no chimney

The new DRU Global 55XT Cavity BF wall fire is the perfect solution for homes without a traditional chimney or where a false chimneybreast is not an option. With its slim depth and perfect log flame effect, created by the unique Truflame Burner®, this stunning fire can easily be installed into your home's cavity wall without losing valuable floor space. With its rear-vented balanced flue, the Global 55XT Cavity BF wall gas fire is the perfect solution for any home.

Characteristics:

- Suitable for installation in a cavity
- Depth only 255 mm
- Eccentric concentric flue (Ø 150/100 mm) on left side
- Snorkel flue and convection box included
- With unique Truflame Burner®, burner is built into ceramic wood logs, causing the flames to lap around them

REMOTE CONTROL, APP, CONTROL HATCH

Useful accessories that make your life easier.

ADDED CONVENIENCE

To make it easier to use your fire, there are various accessories available (depending on the type of fire).

RCH remote control (DRU)

- robust look
- extensive control functions
- Honeywell control

RCE remote control (DRU and Global by DRU)

- modern design
- easy to use
- Mertik control

Domotica Home Automation

- connection to various home automation systems
- switching on and off and adjustable flame height
- switchable 2nd burner (where applicable)
- for both Honeywell and Mertik controls

App + communication module

Do you want to have full control of the flame pattern? Choose the Eco Wave communication module. With a DRU Control App that you can download for free to your smartphone and tablet (IOS/Android), you not only control the fire, but you also set the flame pattern. This is suitable only for fires with the Eco Wave system.

All remote controls have electronic ignition, thermostat and clock.

Management module

DRU and ICY developed a module specifically for the recreation sector (holiday parks, hotels, etc.) to operate gas fires on site as well as from a reception system.

- Includes movement and light sensors for conscious use of energy
- Innovative and easy to use
- Separate remote control and batteries are no longer necessary

Control hatch

For maintenance and in case of faults, DRU has developed a special control hatch that integrates nicely into the set-up of the fire and allows easy access to the gas regulating block.

LUXURY ELEMENTS

Cove ventilation for the protection of your chimney breast.

STYLISH VENTILATION

When using your fire, heat builds up in the chimney breast. It is therefore necessary to ventilate in order not to cause cracks. For this purpose, DRU has developed various LUX elements in ivory-white, alu-metallic and anthracite. These are integrated into the casing and can also have the option of providing supplementary light.

- 1 Ivory-white
- 2 Alu-metallic
- 3 Anthracite

Lux Omni 1 2

Lux Fino 1 3

Lux Lignum 1

Lux 1 2

STANDARD, FRAMELESS OR CUSTOMISED

Choose from a range of frames for your new fire.

Standard frames or frameless

All DRU fires are fitted with a frame as standard. Would you rather seamlessly integrate the fire into the rest of your room? With some fires it is possible to remove the lower part of the frame. This way the fire can be tightly built into a natural stone plateau or recessed into the floor, directly against the glass pane.

Customisation possible

To further personalise your fire, DRU offers you the option of frames in different widths with the below built-in fires. The frames can also be made to measure. In the overview below you can immediately see for which fires this is possible.

Frameless, bottom frame removed

POSITIONING POSSIBILITIES

Freedom to place your fire where you want it.

NO CHIMNEY AND YET A PERFECT PLACE FOR A GAS FIRE?

Install a gas fire, right in the place where you want it. Installation in an existing chimney situation or without chimney directly against an exterior wall is usually quite simple. However, DRU also offers you a solution in other, more complex situations. With the PowerVent® technology from DRU the possibilities are virtually unlimited; think of placement, for example in the middle of your room, in your apartment, restaurant, hotel or in a showroom. The patented innovation PowerVent® allows the flue to run through the crawl space, lengths up to 100 meters

to be bridged, or routes with several turns. PowerVent® from DRU gives you the freedom to think up solutions.

Benefits DRU PowerVent®

- · Complete freedom of placement
- · Ideal for terraced houses, apartments, restaurants, hotels, shops and farms
- Flue lengths up to 100 meters
- Flue route possible through the crawl
- Flue runs with numerous bends

straight or with bends

Scan this

PowerVent® solutions

Via the roof
• flexible pipe in the chimney

Via the roof, outside wall or crawl space

• fan flue

Via roof (pitched)
• straight or with bends

Via wall

- \bullet directly on the fire with a 90 $^{\circ}$ bend to the outside
- possibly on a large part of the range

Via wall

• first 1 meter vertically, then a 90 ° bend

FIRE AND CRAFT-MANSHIP SINCE 1754

What's more comforting than a burning fireplace? Whether you have classic tastes or like clean lines, at DRU you will find the gas fire that suits you perfectly.

Thanks to our knowledge and expertise - we have over 267 years of experience when it comes to comfortable, durable and safe warmth at home - we always offer you the best solution. Our innovative craftsmanship can be found in every model within our range of modern gas fires. These all meet very strict requirements when it comes to durability, efficiency, emissions, safety and ease of use, because we continue to improve ourselves, year after year. If you are looking for atmospheric warmth, then choose DRU.

THE BALANCE BETWEEN PEOPLE AND ENVIRONMENT

Sustainable business operations require a continuous balance between people and the environment. At DRU, customer satisfaction and efficiency go hand in hand with environmental friendliness and safety.

HIGH QUALITY AMBITION

We say what we do and do what we say.

It's an ambitious and critical attitude
that is perceptible everywhere and
drives us to do a little better every day.

THE EASE OF USE THAT MAKES A DIFFERENCE

Ease of use for our customers is always at the heart of what we do and think.

How can our products and services be smarter, more innovative, more satisfying? To keep these in mind we are in constant contact with users, suppliers and our dealers.

ONGOING DEVELOPMENT

Critical, curious, eager to learn, open to feedback, always wanting to do better.

A progressive feeling that is anchored in our DNA. It is the awareness that we can only move forward by continuing to develop ourselves.
